20BT04020 – Madhav Vilpara

20BT04051 – Varada Deshpande

20BT04053 – Harshit Vora

(Students of Semester 2, B. Tech. Computer Science and Engineering, GSFC University, Vadodara, Gujarat)

### Guided By: Ms. Rujul Desai

TABLE OF CONTENTS

BASIC LAYOUT
OF ALL PAGES

Each page of the Mommy's Recipes Website consists of the following:-

- *The header containing a navigation bar*
- *The "main" section for the main contents of the page*
- *The footer containing social media icons for contact purposes*

The navigation bar and the footer is common for all pages, and is responsive, that is, its layout on the page adapts to the screen size.

HEADER

FOOTER

SCROLLBAR

All the pages of the website make use of a custom scrollbar, as seen in the image beside.

PAGES OF
THE WEBSITE

The "Mommy's Recipes" website consists of different pages, the main ones being:

- *The Home Page*
- *The About Page*
- *The Specialties Page*
- *The "Our Chefs" Page*
- *The Contact Page*

Apart from these, there is a "Coming Soon" page, and a different recipe page for each recipe.

TECHNOLOGIES USED

The "Mommy's Recipes" website makes use of HTML, CSS, JavaScript, Bootstrap and jQuery.
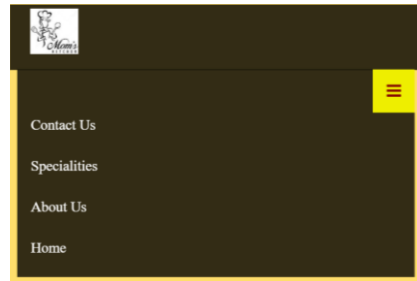

HTML

HTML is of course the basic building block of all the web pages.

CSS

CSS is the basis of all the custom styling of each web page, and the website as a whole.

JAVASCRIPT

JavaScript is used for the "responsive" nature of the navigation bar of all the pages, and for the hide/show buttons for the recipe categories in the "Specialties" Page.

BOOTSTRAP

Bootstrap modal is used for listing out the recipes under the various categories and sub-categories.

JQUERY

jQuery is used for the "counter" functionality in the "About Us" page.

CONTRIBUTION FROM ALL THE GROUP MEBERS

Any work done in group requires sincere and timely contributions from all the members, for a smooth conduct. The "Mommy's Recipes" website wouldn't have been possible without the ideas, support and codes of all the group members. Distinguishing the work by one person from the one done by another in such a group project is as difficult as distinguishing the tastes given by the different ingredients of a recipe.
